# Getting Started with RaceQs 3D Tracking

Please note only 1 person per boat needs to record on RaceQs. Be sure to have a fully charged phone!
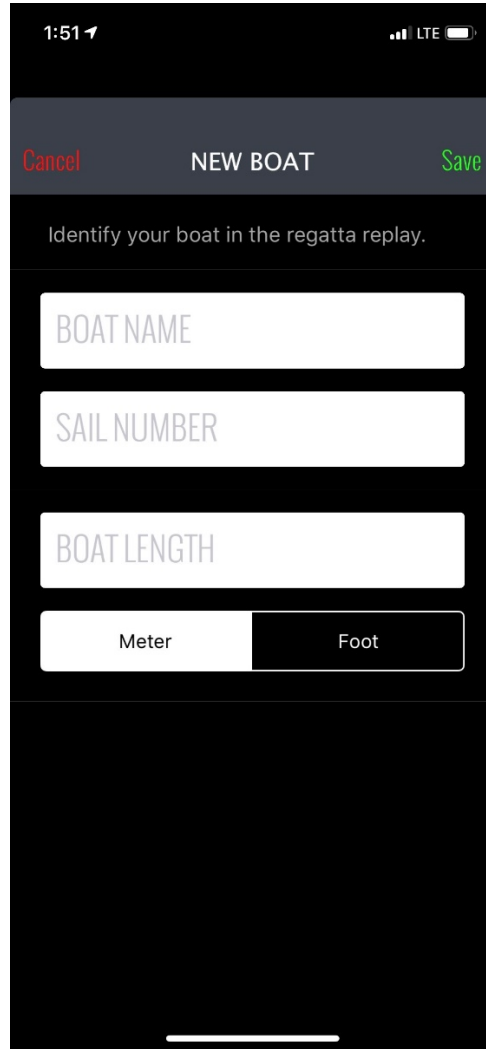

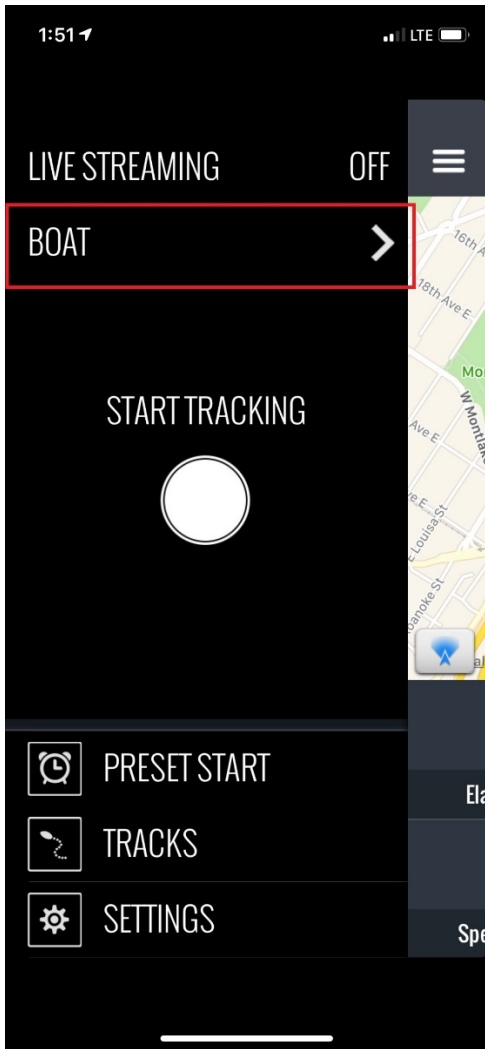

1. Download the RaceQs App

2. Open app and follow directions to create an account
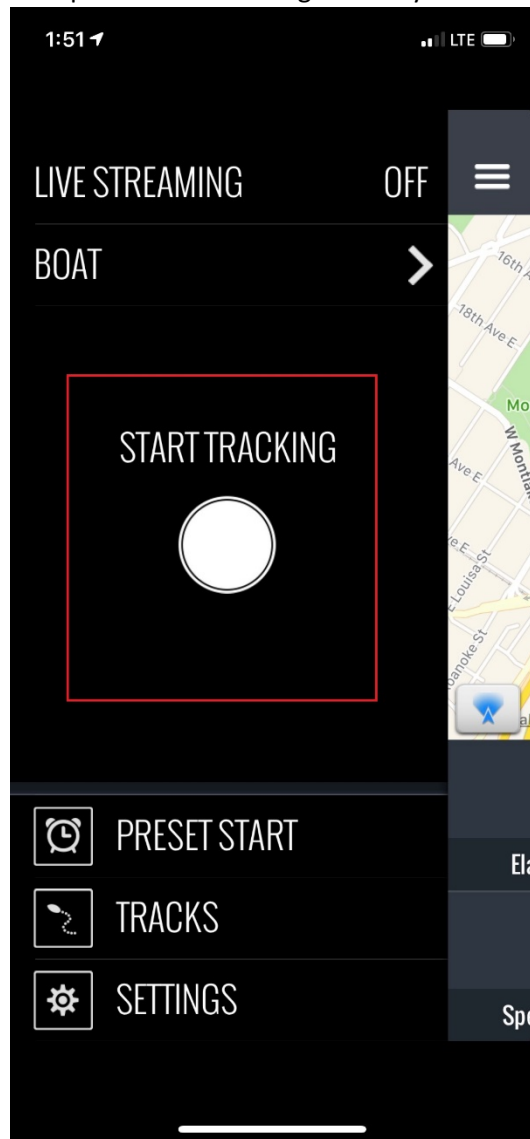

3. Allow app to access location

4. Add new boat. Recordings will show up with this boat name.

5. Start recording (with preset or manual recording start)
   a. Preset when the app will start recording (Note: if you close the app after creating a preset start, the preset start will be cleared!)
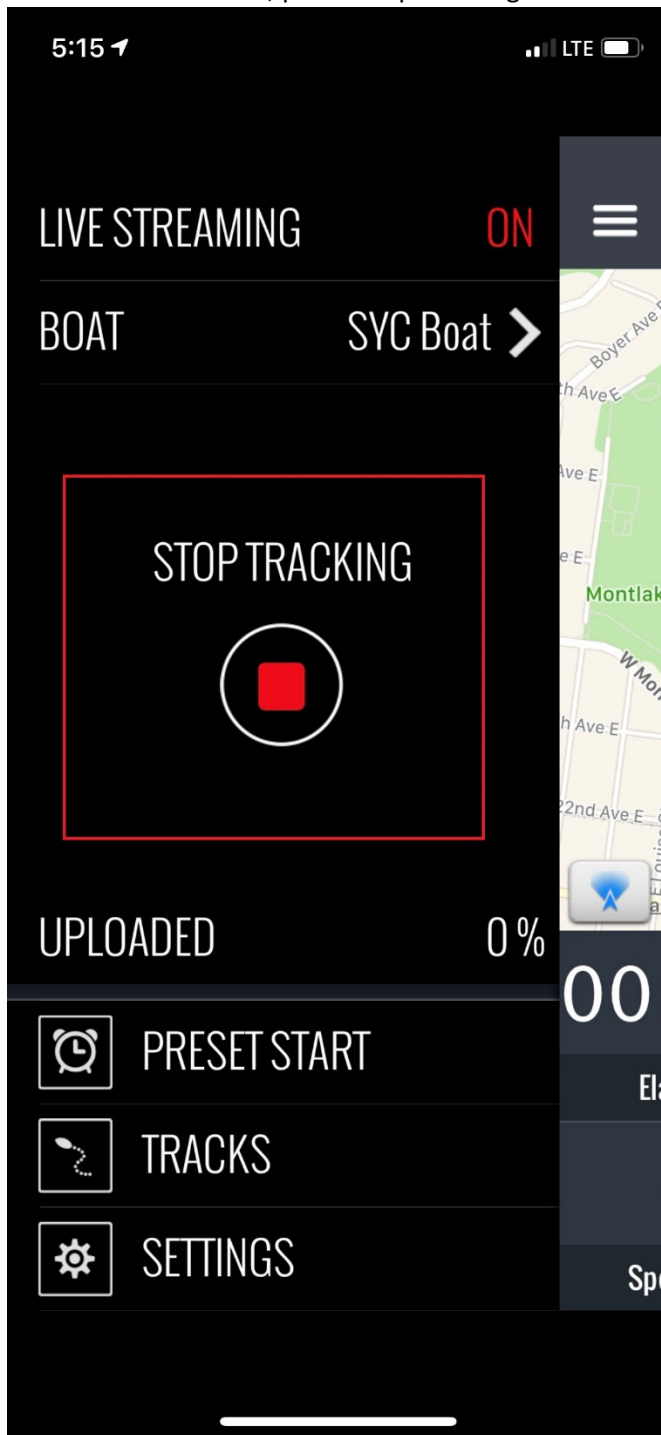

b. -OR- press 'Start Tracking' before your race begins

(You will know you are recording when red dot blinks in top right corner of the app)

6. When the race is over, press 'Stop Tracking'

7. Select 'Save & Upload'

8. If you want to view your tracks after the race, login to raceqs.com on your desktop with the same login info you created on the app. Once logged in, click on your name in the top right corner, and 'My Journal' to see your recordings.

For more information, visit http://raceqs.com/started/

DOWNLOAD IT
Download the free raceQs app onto your Android or iPhone.

GO SAILING
Push one button and raceQs will record everything you need.

UPLOAD IT
Broadcast your track LIVE or upload it via **wi-fi** after the race.

WATCH IT
Login on your computer to raceQs.com to view, edit and share your 3D race replay.
